

# Sea Wracks

## Life on the run

The scraggly lines of marine debris that build up along the high tide mark are known as sea wrack. Made up mainly of seagrasses and seaweeds, sea wrack provides a rich, dynamic environment linking marine and terrestrial habitats. Wind and waves constantly move the wrack so the creatures relying on this moveable feast are adapted to eating and living on the run.

**Use your best detective skills to find the hidden words in the puzzle below.**

- GREEN ALGAE
- BROWN ALGAE
- MACROFAUNA
- BEACH
- SEA WRACK
- SEAGRASS
- SWELL
- FISH NURSERY
- CRUSTACEANS
- NUTRIENTS
- EROSION
- DECOMPOSE
- MARINE FOOD WEB
- DETRITUS
